AFFI Statement on FDA's Extension of Nutrition Facts Labeling Deadline

McLean, Va. – [American Frozen Food Institute](#) (AFFI) President and CEO Alison Bodor issued the following statement today on the U.S. Food and Drug Administration's (FDA) announcement to extend the compliance date for label changes to the Nutrition Facts Panel (NFP).

"AFFI commends FDA's decision to provide frozen food and beverage makers additional time to implement changes to the Nutrition Facts Panel.

"AFFI members are committed to updating the NFP and providing consumers with the information they need to make informed choices. Additional time and final guidance from FDA will help AFFI's members, especially our small and medium-sized companies, make these changes and also lessen the financial burden of doing so."

###

The American Frozen Food Institute is the member-driven national trade association that advances the interests of all segments of the frozen food and beverage industry. AFFI works to advance food safety and advocates before legislative and regulatory entities on the industry's behalf to create an environment where members' foods and beverages are proudly chosen to meet the needs of a changing world.
