AFFI Welcomes Controlled Azane Refrigeration as Newest Advantage Partner

Arlington, VA – The [American Frozen Food Institute](#) (AFFI) recently welcomed [Controlled Azane Refrigeration, Inc.](#) as an AFFI Advantage Partner. The [AFFI Advantage Partner Program](#) is designed to supplement the marketing efforts of participating associate members of the Institute by providing them with increased exposure and access to frozen food and beverage companies with whom they wish to forge new business relationships.

“We are pleased to welcome Controlled Azane Refrigeration as the newest participant in the AFFI Advantage Partner Program,” said AFFI President and CEO Alison Bodor. “As our members invest in their facilities and seek industrial cooling systems that are safe and sustainable, I am pleased that Controlled Azane Refrigeration is bringing these options to the marketplace in the United States.”

[Controlled Azane Refrigeration](#) is dedicated to being the leading provider of Low Charge Ammonia Refrigeration Systems in North America.

“Our partnership with AFFI and its members will enhance the value and visibility of Controlled Azane Refrigeration,” said Azane Refrigeration President and CEO Rick Loesel. “This is an emerging market driven by improved risk management solutions, environmentally superior systems, more cost-efficient offerings, reduced regulatory compliances, and great flexibility and even portability opportunities.”

All associate members currently in good standing with AFFI are eligible to apply for participation in the AFFI Advantage Partner Program.

###

The American Frozen Food Institute is the member-driven national trade association that advances the interests of all segments of the frozen food and beverage industry. AFFI works to advance food safety and advocates before legislative and regulatory entities on the industry’s behalf to create an environment where members’ foods and beverages are proudly chosen to meet the needs of a changing world.
